DESCRIPTION OF SURVEYS

Each year, the Office of Analysis, Assessment, and Accreditation conducts a survey of freshmen and sophomore students and also graduating baccalaureate students to determine their attitudes and perceptions regarding their USU experience. In addition to some general demographic questions, the focus of the surveys included topics on: Advising, Faculty/Department Experiences, General Education, Libraries/Technology, Campus Climate, and overall USU Experiences.

With the exception of some demographic questions, both of these surveys are the same. The similarity of the instruments allows a comparison of responses of students early in their USU experience and upon the completion of their USU academic programs in order to see how attitudes and perceptions may have changed over time.

SAMPLE SELECTION AND SURVEY ADMINISTRATION

The Freshman/Sophomore Student Survey was administered during class time to a sample of classes with high proportions of freshmen and sophomores. All of the students in each class filled out the survey and freshmen and sophomores were sorted out later. Sorting was done using a survey question that asks the students to report the number of credit hours they have completed. Over 1,000 surveys were completed each year and these are the basis of the freshman/sophomore results.

With the Graduating Student Survey, an attempt was made to survey all of the undergraduate, graduating population. Surveys were distributed as part of the graduation application packet. All students were instructed to fill out the survey and return it with their graduation application materials. Upon payment of the graduation fee, surveys were collected by the Cashier's Office. Over 1,500 usable surveys were completed each year and these are the basis of the graduating student results.

DATA PRESENTATION

This comparison report focuses on a subset of the items from the two surveys and includes data collected over a four year period. The tables compare results from the Freshman/Sophomore Student Survey for 2005 to 2008 with those from the Graduating Student Survey for the same four year period.

YEAR-TO-YEAR VARIATIONS

An interesting and important finding that resulted from evaluating the data over a four year period was that there tends to be little variation of ratings over time. That is, for most of the survey questions, the numbers from the Freshman/Sophomore Student Survey and also from the Graduating Student Survey did not change very much from year-to-year.

RESPONDENT CHARACTERISTICS (See Table 1)

In 2005 the sample of respondents from both groups contained a bare majority of female students. In 2006 there were a bare majority of male freshman and sophomore students and a bare majority of female graduating students. In 2007 and 2008 there were more male freshmen and sophomores and more female graduating students. In all years graduating students were about five times more likely to be married than freshman/sophomore students.

TABLE 1. RESPONDENTS CHARACTERISTICS

	FRESH-SOPH 2005	GRADUATING 2005	FRESH-SOPH 2006	GRADUATING 2006	FRESH-SOPH 2007	GRADUATING 2007	FRESH-SOPH 2008	GRADUATING 2008
Gender								
Male	49.8%	46.5%	50.6%	45.4%	54.6%	46.3%	51.2%	48.6%
Female	50.2%	53.5%	49.4%	54.6%	45.4%	53.7%	48.8%	51.4%
Married	8.3%	47.4%	10.5%	50.4%	10.9%	48.8%	9.5%	49.2%

FINDINGS: SOURCES OF FINANCIAL AID (See Table 2)

Questions were asked to determine how students supported themselves through college. Students were asked to indicate the percent of their financial support for school (tuition, books, housing, food, etc.) that came from each of the sources mentioned. The percentages in the table are the averages for each source.

For both freshman/sophomore and graduating respondents, self and families were the most important sources of funds. A few more graduating respondents received loans or grants.

Fewer graduating students than freshman/sophomore students did not work at all. Typically, more graduating students work more hours than freshman and sophomore students. The increased tuition costs for students usually forces them to work more as time goes on.

FINDINGS: ADVISING (See Table 3)

The survey included several questions about USU's academic advising program. When asked about the most important source of information used for academic planning, the first choice of the freshman/sophomore respondents was their academic advisor, while the first choice for graduating respondents was the Major Requirement Sheets, except in 2007 and 2008 where the advisor was the first choice. More freshman/sophomore respondents than graduating respondents had not met with their advisor during each school year. The most common number of advisor visits for both groups was once a semester.

When asked if their advisor gave them good advice, fewer freshman/sophomore respondents (59%, 61%, 62%, and 59%) agreed or strongly agreed than graduating respondents (73%, 74%, 73%, and 74%). About 62%, 64%, 62%, and 65% of the graduating respondents said their advisor cared about them as an individual, but only about 41%, 42%, 44%, and 45% of the freshman/sophomore respondents felt the same way. When responding to the question, "I often have difficulty getting an appointment with an advisor," more respondents in both groups disagreed or strongly disagreed that getting an appointment was difficult. When asked if they were satisfied with their advisor, more graduating respondents (72%, 73%, 72%, and 74%) agreed or strongly agreed than freshman/sophomore respondents (53%, 52%, 57%, and 53%). When rating the advising system at USU, 52%, 51%, 56%, and 54% of the freshman/sophomore respondents agreed or strongly agreed that they were satisfied with the advising system at USU, while 58%, 61%, 59%, and 63% of the graduating respondents agreed or strongly agreed.

Strongly disagree	5.3%	6.6%	3.8%	6.8%	3.2%	6.8%	4.4%	6.4%

NOTE: Percentages are based on the number of students responding to each question.

FINDINGS: FACULTY/DEPARTMENT EXPERIENCES (See Table 4)

Several questions about faculty and department interactions were included in the survey. When responding to the statement, "I am satisfied with the quality of teaching in my department", responses between the two groups and the four years were very similar, 76%, 79%, 76%, and 77% agreement for freshman/sophomore respondents and 77%, 82%, 81%, and 81% agreement from graduating respondents. More graduating respondents (86%, 87%, 88%, and 89%) than freshman/sophomore respondents (77%, 79%, 78%, and 79%) said they were treated fairly by their departments. When rating the availability of faculty after classes and during office hours, graduating respondents rated this item slightly higher in all years (85%, 88%, 87%, and 88%) than freshman/sophomore respondents (78%, 80%, 81%, and 79%).

When asked if requirements for their majors were clear and reasonable, more graduating respondents (79%, 82%, 83%, and 82%) agreed or strongly agreed than freshman/sophomore respondents (71%, 71%, 72%, and 69%). When asked if there was at least one faculty member students considered a friend, graduating respondents clearly had more opportunities for such to happen as 67%, 68%, 69%, and 70% agreed or strongly agreed, while 31%, 35%, 35%, and 36% of the freshman/sophomore respondents agreed or strongly agreed.

More graduating respondents (84%, 87%, 86%, and 87%) than freshman/sophomore respondents (72%, 74%, 73%, and 74%) agreed or strongly agreed that, overall, they were satisfied with their department.

FINDINGS: GENERAL EDUCATION/UNIVERSITY STUDIES (See Table 5)

Most freshman/sophomore students spend much of their time in general education courses, while graduating students are often trying to finish the general education courses they had not yet completed earlier. These courses are designed to enhance students' communication, quantitative, and computer literacy skills and to give them needed background in humanities and in the social, life, and physical sciences. Students were asked to respond to the statement "General Education is a useful part of my university experience." A few more freshman/sophomore respondents (50%, 50%, 49%, and 49%) than graduating respondents (45%, 47%, 43%, and 46%) agreed or strongly agreed with this statement. Again, a few more freshman/sophomore respondents (41%, 40%, 38%, and 41%) than graduating respondents (34%, 37%, 37%, and 40%) agreed or strongly agreed that general education courses were well-taught.

Similar percentages in both groups, 35%, 32%, 30%, and 33% of the freshman/sophomore respondents and 35%, 29%, 29%, and 27% of the graduating respondents, indicated that they had difficulty scheduling general education courses. When asked if general education requirements were confusing, similar agreement ratings were reported by both freshman/sophomore respondents (31%, 30%, 33%, and 36%) and graduating respondents (34%, 33%, 30%, and 29%).

When respondents were asked about their writing, computer, and mathematics skills, graduating respondents were much more confident in their abilities in each of these areas. Since graduating students would have more experience, their confidence level would be expected to be higher.

TABLE 4. FACULTY/DEPARTMENT EXPERIENCES

NOTE: Percentages are based on the number of students responding to each question.

FINDINGS: LIBRARIES/TECHNOLOGY (See Table 6)

These items deal with experiences involving library materials and staff, online courses, and classroom technology. When asked if “USU libraries have the books, journals, materials I need”, both freshman/sophomore respondents and graduating respondents rated this between 68% and 77% agreement. Surprisingly, more freshman/sophomore respondents (47%, 47%, 53%, and 52%) than graduating respondents (31%, 37%, 40%, and 40%) thought it was easy to locate materials in USU’s libraries. Similar percentages of freshman/sophomore respondents (64%, 67%, 72%, and 72%) and graduating respondents (68%, 62%, 63%, and 67%) thought that the library staff was available and helpful.

When asked, “USU should offer more online courses”, more graduating respondents (52%, 46%, 44%, and 43%) than freshman/sophomore respondents (32%, 30%, 33%, and 30%) agreed or strongly agreed. When asked if their teachers used technology effectively in the classroom, freshman/sophomore respondents ranked this item 74%, 80%, 76% and 75% while graduating respondents ranked it 74%, 77%, 72%, and 77%.

FINDINGS: CAMPUS CLIMATE (See Table 7)

This group of questions dealt with student opinion regarding safety issues, tolerance of students and staff, diversity, and a sense of being cared about at Utah State University.

An overwhelming majority of both freshman/sophomore respondents (88%, 92%, 91% and 90%) and graduating respondents (92%, 92%, 92%, and 95%) felt safe on the USU campus. Seventy-four percent, 76%, 77%, and 77% of the freshman/sophomore respondents and 67%, 72%, 72%, and 74% of the graduating respondents agreed or strongly agreed that professors at USU are tolerant of different points of view. Fewer respondents in both groups felt students were tolerant of different points of view. Sixty-one percent, 59%, 61%, and 61% of the freshman/sophomore respondents and 54%, 56%, 57% and 59% of the graduating respondents agreed or strongly agreed with this statement.

More freshman/sophomore respondents (70%, 70%, 73%, and 73%) than graduating respondents (52%, 51%, 54%, and 56%) thought that USU provided enough activities for its students. A few more freshman/sophomore respondents (67%, 71%, 71%, and 73%) than graduating respondents (62%, 58%, 61% and 62%) got to know students from other countries and of other races.

A majority of respondents, 57%, 63%, 63%, and 64% (freshman/sophomore) and 64%, 67%, 67%, and 71% (graduating) agreed or strongly agreed that faculty at USU cared about students. Similar percentages, 55%, 60%, 59%, and 60% of the freshman/sophomore respondents and 56%, 57%, 57%, and 63% of the graduating respondents, agreed or strongly agreed that staff at USU cared about students. Overall, a majority of respondents from both groups saw USU as a safe, tolerant, and caring place to be.

FINDINGS: OVERALL USU EXPERIENCES (See Table 8)

Several questions were included in the survey to determine students’ general perceptions of USU. When students were asked if they were satisfied with the education they were receiving at USU, a few more graduating respondents (88%, 89%, 88%, and 89%) than freshman/sophomore respondents (84%, 84%, 85%, and 85%), agreed or strongly agreed.

In evaluating whether tuition was a worthwhile investment for USU students, more graduating respondents (70%, 69%, 69%, and 72%) than freshman/sophomore respondents (54%, 58%, 60%, and 61%) agreed or strongly agreed. When students were asked, “If I had to make the decision again, I would still come to USU”, 71%, 75%, 76%, and 75% of the freshman/sophomore respondents agreed or strongly agreed, while 75%, 78%, 79%, and 81% of the graduating respondents agreed or strongly agreed.

Students were asked what they would tell a graduating high school student about Utah State University. The four choices were: (1) It's great, come here, (2) Mostly positive things, (3) Mostly negative things, (4) It's not great, don't come here to school. Between 3% and 5% of both groups selected (3) and (4), while over 95% of both groups said USU was great or at least mostly positive things about the university.

LOCATION OF FULL REPORTS

The reports and additional data for each of these studies can be found on the Analysis, Assessment, and Accreditation Web Site (<http://aaa.usu.edu/FactsFigures/surveys.asp>).
